

REMARKS

The Office Action of 04/27/2007 has been carefully considered. Reconsideration in view of the foregoing amendments and the present remarks is respectfully requested.

An Abstract has been submitted on a separate sheet as required. Also, a REPLACEMENT SHEET in which appropriate labels have been added to Figure 1 is submitted herewith.

The addition of headings to the specification was suggested. As such headings have in the past been known to affect the scope of protection afforded, Applicant respectfully declines.

The Office Action inquired as to support for the prior amendment, in particular the feature of "memory elements for storing digital data." The specification refers throughout to "data words." This term is understood by those of ordinary skill in the art to mean a set of related data bits, a data bit being the basic unit of digital data. Accordingly, the amendment is believed to find ample support in the specification, claims and drawing as original filed.

Favorable consideration is respectfully requested.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "M. Ure", is written over a horizontal line.

Michael J. Ure, Reg. 33,089

Dated: 05/25/2007
